

Horizontal Air Receivers (3.8m³ to 25m³)

Airpac Bukom's range of horizontal air receivers are capable of storing from 3.8m³ (3800 litres) to 25m³ (25000 litres) of compressed air. Pressures range from 8.8 barg (127.5 psig) to 25.2 barg (365 psig).

The air receivers can be used to supply air tools for general maintenance and large volume storage requirements, typically for blowing applications on and offshore.

The smaller units are mounted in a certified lifting frame for ease of transportation and protection on site.

All Airpac Bukom air receivers are equipped with calibrated safety valves and gauges.

Alternative inlet and outlet connections can be fitted to suit your application. Please contact your local Airpac Bukom representative to discuss the options.

Options

- Pressure reducing valves
- Experienced personnel providing a complete operational package including: hook-up & commissioning, servicing, re-fuelling and multiple installation assistance
