

## 10,000 psig and 15,000 psig Coflexip Hoses

Airpac Bukom's range of Coflexip hoses include standard 10,000 psig Rilsan lined hoses and high temperature 15,000 psig Coflon lined hoses which are available in various lengths and pressure ratings.

Our rental inventory of Coflexip choke & kill and production lines are specifically designed to cope with the high pressures and flow rates these applications require.

The hoses, which replace hard pipes when appropriate, are used to transfer fluids from the surface test tree to the rest of the surface test package, kill pumps or stimulation package.

Coflexip hoses provide flexible options when connecting the wellhead to the well testing packages, on both fixed offshore installations and mobile drilling rigs.

### Features

- Suitable for a wide variety of applications including oil production, water injection, gas lift and stimulation
- Nikaflex® coated end-fittings means no corrosion
- Do not pulsate or whip during high flow rates
- High crush resistance
- Integral end-fittings
- Only two connections
- No maintenance (no immediate seals to be replaced)
- Handling collars fitted at each end

### Options

- **End Connections**  
3" fittings: API type 16BX 3 $\frac{1}{16}$ " integral hub connections for gasket BX154  
10,000 psig Clamp Size No.5  
15,000 psig Clamp Size No.6
- **Crossovers**  
10,000 psig Fig 1502 Weco  
15,000 psig Fig 2202 Weco

Please contact your local representative for further information regarding product flow compatibility and end connection options.

# Technical Specifications

## 10,000 psig and 15,000 psig Coflexip Hoses

Type	Internal Diameter (ID)	Pressure	Length	Temperature Rating
<b>Standard Rilsan Lines:</b>				
Coflexip	3"	10,000 psig	21000mm / 827"	-20°C to +100°C (-4°F to +212°F)
Coflexip	4"	10,000 psig	21000mm / 827"	
<b>High Temperature Coflon Lines:</b>				
Coflexip	3"	15,000 psig	21000mm / 827"	-20°C to +130°C (-4°F to +266°F)
